SUMMARY

An experienced, capable and agile IT Professional with a demonstrated history of focus and accomplishment in formulating Systems development and administration solutions for large corporates. Through a balance of academia and "hands on" working experience, I have attained rare and transferable technical competencies that include a highly developed goal orientation, effective team leadership and efficient task prioritisation. I believe that this mix of skills would add significant value to any employing organisation. My value proposition for prospective employers is surmised as a transfer of technical and academic prowess, single minded focus and conceptual / practical agility in exchange for the acquisition of a higher level of professional learning, growth and development.
